- Stored Procedure.
- Work in agile methodology
- Healthcare Domain & Life Insurance
- ENDEVOR
- Mainframe Scripts (Rumba Scripts)

Other Technical Information.

Industry / Market Segment	Healthcare , Life Insurance
Databases & Tools	DB2, Microsoft SQL Server 2008/2012.
Other Utilities	MS Office 2010,MS Visio 2010 Professional, Clear Quest (CQ), Clear Case, C A –WLA.

Current Project:-

Client	Manulife Financial
Duration	May 2018 till date.
Role	Technical Associate.
Responsibilities	<ul style="list-style-type: none">➤ Enhancing the functionality of Policy Admin system (Ingenium Based).➤ Performed end to end Analysis/ Design/Development/Unit Testing/deployment and support for different projects.➤ Worked on Agile Methodology.➤ Solving incident (job failure) within the given SLA.➤ Proactively provide a solution for repetitive Incidents for a permanent fix.➤ Updating Task-Log with a proper solution for future reference in Lotus DB and Service now for the incident.➤ Provide On-call support as well➤ Leading a team of 6 people in a new project.
Technology	Cobol and JCL and DB2, VSAM, Easytrieve .

Previous Project Details:-

Project Title	Plan Sponsor.
Client	Aetna: - is an American managed health care company.
Duration	July 2014 – May 2018(Main project)
Project Description	The projects I have worked on primarily dealt with development of mainframe applications which contained changes in both online (CICS) and Batch processing. I have also worked on interface related changes which mainly contained Services and Stored procedures. I have actively contributed to analyze the system changes resulting from any health care act amendments. Last but not the least I have been instrumental in bridging the gap to clients by suggesting and working on proactive ideas for increasing business value adds and

	ultimate customer delight
Role	Technical Analyst
Responsibilities	<ul style="list-style-type: none"> ➤ Performed end to end Analysis/ Design/Development/Unit Testing/deployment and support for different projects. ➤ Analyzed the system as per requirements and found out the optimal solutions to meet the business needs. ➤ Handle new Service request from end to end including design, data in-Out Layout, Interface setup (creating Deployment Diagram), integration and deployment. ➤ Proactively provided my inputs in business grooming calls for clearer requirements and tried to reduce gaps in understanding of clients by fortifying transparency via case studies, process and complex flowcharts. ➤ Have undertaken code review and design review of peers and mentees on several occasions. ➤ Have conducted testing and installed the projects to production ➤ Have proactively provided new ideas to enhance the existing application. ➤ As part of DP team, proactively provide different Defect prevention techniques to reduce defect count in QA phase and production. ➤ Being an implementation coordinator, I have always made sure all the production implementation related activities were as per desired standards. ➤ Have submitted multiple automation tools to reduce injection of annual errors whilst saving effort and time. ➤ As a part of zero distance initiative, I have employed my technical prowess and domain knowledge to provide ideas for adding to the business value and client satisfaction.

Project #1.

Project Title	Aetna-Coventry Integration (Under Plan-Sponsor).
