Table 1.1:	Reference books for the programming of ISPF applications
Table 1.2:	ISPF service groups
Table 2.1:	Arithmetic REXX operators
Table 2.2:	Compare operators
Table 2.3:	Logical operators
Table 3.1:	REXX host command environments
Table 3.2:	Table of PARSE types
Table 4.1:	REXX function groups
Table 4.2:	Parameters of the DATE function
Table 4.3:	Options of the TIME function
Table 4.4:	DATATYPE type options
Table 4.5:	Description of parameters for the FORMAT function
Table 7.1:	ISPF system variables concerning error messages
Table 7.2:	Search sequence in the procedures libraries
Table 8.1:	Grouping of LM commands necessary for a particular type of data processing
Table 8.2:	Data set query services
Table	Variables returned by the LMDLIST service
