Project Experience   Feb 2017-Till date

Designation: Analyst Programmer
Team Size: 12
Customer/Client Name: HUMANA, USA
Project: Customer Interface (CI)

Project Details :

Humana is one of the major health insurance company in United States and Puerto Rico. CI Medicare is one of the critical systems for Humana Inc. which stores member's data enrolled for health insurance and processes the Medicare, Medicaid, Medicare supplementary (MedSupp) and few commercial groups. CI also feeds

information to different downstream systems (like ODS, CCP, EDW, etc) across Humana to make sure that member has access to care.

Roles and Responsibilities :

- Fixing of production abends within SLA and working on root cause analysis for the same.
- Writing COBOL programs for insert, update and delete of data in DB2 table for large number of records through oneshot.
- Permanent/temporary fixes in code, JCL changes for abends, etc.
- Worked on client requests for data changes and analysis on program.
- Worked on tickets (Incident, Change Order and Problem) for the team.
- Have ensured that the deliverables meet the SLA & quality standards of the project to avoid rework.
- Have worked on Adhoc tasks that include working on SD tickets for performance enhancements and tuning.
- Monitor the critical batch cycle, working in shifts and co-ordinating with onshore counterpart.
- Involved in Quality related works.

Achievements

- Bagged the Syntel's **SPOT** Award for excellence in work environment.
- Also, received appreciation from Client for efficiently handling critical issues.
